14,491 heads of families representing 18.47% of 78,466 displaced families

25 agencies & organizations
205 field enumerators

Survey period
21-28 August 2017

Situationer

a. Home-based and evacuation center-based IDPs continue to experience limited access to information on how they can access assistance, or about plans from government for return, temporary shelter options, and early recovery. For home-based IDPs, they rely on the host barangay chairman for information and updates on any development on their status.

b. A number of IDPs interviewed (both in evacuation centers and home-based) did not understand the DAFAC registration process.

c. There is no segregated data yet, or clear information on Persons with Special Needs (PWSN). Information on the vulnerable population such as unaccompanied and separated children, pregnant and lactating mothers, persons with disabilities, elderly persons, and persons with serious medical conditions, is also lacking.

Key advocacy / Protection Messages

a. Access to information is consistent, so that IDPs are kept abreast of what the government is doing for them during their state of displacement, as well as what government is planning to do on their early recovery and rehabilitation.

b. Establishment of an accessible and effective grievance mechanism/system to address cases of exclusion from registration and assistance distribution.

c. Consultation processes, in which IDPs are able to fully participate and express their needs and concerns, are initiated prior to implementation of recovery and rehabilitation plans, or establishment of transitional sites to address cases when return or other durable solutions are not possible in the immediate to medium term.

Access to Information and IDP Participation

94% of the respondents said that they know about the government programs for the displaced population affected by the Marawi siege.

Rehabilitation in Marawi: 55%
Temporary Settlement: 44%
